19 June 1978

MEMORANDUM FOR: Deputy Director of Regional and Political Analysis
FROM: Director of Central Intelligence
SUBJECT: Paper on State of Play in the Aegean

25X1 1. This one's all fouled up. The question, as in your memo to [] is what are the Greeks up to. Instead, what we have here is two pages of history that Brown and Duncan both know adequately for their purposes, and then some discussion of the current negotiations. Paragraph 6 begins to get to the issue but does not approach it from the point of view of what are the Greeks up to here - are they serious or are they putting up a front?

2. Paragraphs 9 and 10 are not needed.

3. The corridors I was asking about are sea corridors not air corridors. They are shown on a chart that I used in a Presidential briefing about a month ago. They show one corridor coming out from the Dardanelles area and one from Izmir. I was told they were a new Greek proposal. They seem to me to be a reasonable step forward - a genuine Greek effort to solve the problem.

4. Please redo the whole thing quickly cutting it down, answering the basic issue and including at least that one chart.
